

## SANDY SEPTIC SAYS

- \* Do you know how old I am? Since you depend on me, it might be good to check! I don't last forever, ya know! Call Public Health Dept for permit information
- \* Do you really know where I am? Jeez! I hope I'm not too close to the well, am I? Could make you sick if I am - better check!
- \* Don't run water down the drain needlessly - it bloats me! AND causes an extra load on my system
- \* Garbage disposals add extra solids and water too - It's not like I could let my belt out another notch! Scrape dishes clean and consider a compost pile for certain scraps
- \* Don't drive over me or plant a tree on top of me! Talk about a headache!
- \* I don't really need additives if I'm working properly - save your money, but if I'm sick, bite the bullet and call the plumber or the pumper!
- \* PULEEZE! Don't send me presents.....like diapers, sanitary napkins, paper towels, or anything plastic - makes me gag! AND probably means another visit from the plumber! Money, money!
